Description

Load Packages

If the libraries are not installed yet, you need to install them using, for example, the command: `install.packages("ggplot2")`. For the Hrate package this is different, since it comes from github. The devtools library needs to be installed, and then the `install_github()` function is used.

```
# install the latest version of neuralnet with bug fixes: devtools::install_github("bips-hb/neuralnet")  
library(neuralnet)  
library(sigmoid)  
library(caret)
```

Load Data

Load data table with estimated feature values per sequence.

```
# load estimations from stringBase corpus  
estimations.df <- read.csv("~/Github/NaLaFi/results/features.csv")  
#head(features.csv)
```
